elderly, 402–409
Health behaviors
American Indian women, 160–167
Health determinants modeling
infant mortality, 262–271
Health surveys
mammography estimates in elderly women, 439–444
smoking among inner-city children, 308–318
Hemodialysis
prediction and evaluation, 192–200
Hispanic-Americans
insulin and blood pressure, 236–244
HIV
risk factors, 168–174
HIV seroprevalence
tuberculosis, 168–174
Hypertension
awareness, 3–13
prevalence, 3–13, 14–21
risk factors, 14–21
treatment, 3–13
weight gain effects, 497–503
Hyperuricemia
association with insulin resistance syndrome, 250–261

I
Idiopathic progressive neuropathy
prosthetic nonbreast implants, 319–326
Implants
effects, 319–326
Incidence ratio
cross-sectional studies, 52–55
Income
effects on melanoma, 327–333
Insomnia
effects, 384–392
Institutional Review Boards (IRBs)
review (editorial), 479–481
Insulin
ethnicity, 236–244
lipids in Asian Americans, 92–98
Insulin resistance
alternate measures, 358–369
Insulin resistance syndrome
hyperuricemia effects, 250–261
Interaction
effects, 154–159
Intervening variables
infant mortality modeling, 262–271
Interview methods
third-party effects, 272–277
Intraclass correlation
epidemiological regression analyses, 56–63
Iron
effects, 154–159
Ischemic heart disease
prevention, 217–228
risk factors, 415–421

L
LDL
smoking and alcohol effects, 31–38

AEP Vol. 8, No. 8
November 1998: 533–538

Lebanon
tumor registry, 46–51
Lipids
sex hormones effects, 39–45
Lipoproteins
insulin and Asian Americans, 92–98
Litigation
epidemiology, 79–82
Liver cirrhosis
risk factors, 154–159
Longitudinal studies
ischemic heart disease risk factors and aging, 415–421
Low birth weight
vitamin/mineral use and smoking effects, 175–183

M
Mail survey
aged population, 342–346
Mammography
estimates in elderly women, 439–444
Managed care
epidemiology, 79–82
Markers
caffeine, 107–111
Maternal smoking
effects, 175–183
Measurement error
epidemiological regression analyses, 56–63
Measurements
insulin sensitivity, 358–369
Medicare
mammography estimates in elderly women, 439–444
Melanoma
socioeconomic effects, 327–333
Men
alcohol effects on mortality, 147–153
ischemic heart disease risk factors and aging, 415–421
Meningitis
cryptococcosis, 212–216
Menopause
effects, 229–235
Meta-analysis
cancer among farmers, 64–74
Metropolitan Relative Weight
obesity and smoking, 289–300
Micronutrients
effects, 154–159
Migrants
cardiovascular disease, 334–341
Minorities
cardiovascular disease, 334–341
coronary heart disease, 184–191
Miscarriage
smoking effects, 520–526
Morbidity
kidney outcomes prediction and evaluation, 192–200
Mortality
alcohol, 147–153
alcohol (editorial), 145–146
cardiovascular disease, 334–341
kidney outcomes prediction and evaluation, 192–200
menopause, 229–235
obesity and smoking, 289–300
risk factors, 99–106
Multivariate methods
infant mortality modeling, 262–271
Multivitamins
effects, 175–183
Myocardial infarction
risk factors, 384–392

N
Natural killer cells
role in chronic fatigue syndrome, 245–249
Non-Hodgkin lymphoma
chronic fatigue syndrome effects, 245–249
Nutrition assessment
aged population, 342–346
Nutrition survey
aged population, 342–346

O
Obesity
children, 422–432
effects, 250–261
insulin and Asian Americans, 92–98
smoking effects, 289–300
Obstructive lung diseases
effects, 99–106
Odds ratio
cross-sectional studies, 52–55

P
Path analysis
infant mortality modeling, 262–271
Pesticides
cancer among farmers, 64–74
Pol-MONICA Project
results, 3–13
Population trends
HDL levels, 84–91
HDL levels (editorial), 83
Predictive values
exercise testing with asthma, 201–208

Pregnancy
caffeine, 107–111
maternal physical activity and infant size, 513–519
Premature ovarian failure
effects, 229–235
Preterm birth
vitamin/mineral use and smoking effects, 175–183
Prevalence
obesity in children, 422–432
smoking among inner-city children, 308–318
Prevalence odds
cross-sectional studies, 52–55
Professional ethics
epidemiology, 482–489
Professional standards
epidemiology, 482–489
Public health surveillance
HIV seroprevalence, 168–174
P-values
clinical trials (editorial), 349–350

Q

QT interval
increased
effects, 99–106
Quality of life
kidney outcomes prediction and evaluation, 192–200
Questionnaires
exercise testing with asthma, 201–208
third-party effects, 272–277

R

Race
cardiovascular disease risk factors, 22–30
Re-analyses
epidemiologic data (editorial), 286–288
Regression analysis
cross-sectional studies, 52–55
obesity in children, 422–432
Regression dilution
epidemiological regression analyses, 56–63
Regression model
blood pressure, 504–512
Regression modeling
socioeconomic characteristics and melanoma incidence, 327–333
Reliability coefficient
epidemiological regression analyses, 56–63
Renal replacement therapy
prediction and evaluation, 192–200
Reporting errors
smoking, 393–401
Riboflavin
effects, 154–159
Risk factors
cardiovascular disease, 217–228, 229–235, 250–261, 358–369
developing countries (editorial), 1–2
elderly (editorial), 411–414
race, 22–30
South Korea, 14–21
coronary heart disease, 384–392, 490–496
disease in American Indian women, 160–167
HIV, 168–174
hypertension, 14–21
ischemic heart disease and aging, 415–421
liver cirrhosis, 154–159
miscarriage, 520–526
mortality, 99–106
myocardial infarction, 384–392
obesity in children, 422–432
Russia
alcohol effects on mortality, 147–153

S

Secular trends
HDL levels, 84–91
Sensitivity
exercise testing with asthma, 201–208
Serum
caffeine during pregnancy, 107–111
Sex hormones
effects on lipids and blood pressure, 39–45
Silicone
effects, 319–326
Sleep complaints
effects, 384–392
Small-for-gestational-age
vitamin/mineral use and smoking effects, 175–183
Smoking
effects, 31–38, 175–183, 378–383
inner-city children, 308–318
maternal, 520–526
screening reports, 393–401
trends, 301–307
Socioeconomic status
effects on melanoma, 327–333
Specificity
exercise testing with asthma, 201–208
Sucrose
effects on HDL, 433–438
Supplements
effects, 175–183
Surveillance
cryptococcosis, 212–216

AEP Vol. 8, No. 8
November 1998: 533–538

Surveys
ethics, 482–489
mammography estimates in elderly women, 439–444
methods
census-based design, 278–282
third-party effects, 272–277
Systemic sclerosis
prosthetic nonbreast implants, 319–326

T

Titanium
effects, 319–326
Transients
cardiovascular disease, 334–341
Triglycerides
hyperuricemia effects, 250–261
insulin and Asian Americans, 92–98
smoking and alcohol effects, 31–38
Tuberculosis
HIV seroprevalence, 168–174
Tumor registry
cancer in Lebanon, 46–51
Type I errors
clinical trials, 351–357

U

Uric acid
hyperuricemia and insulin resistance syndrome, 250–261
U.S.
alcohol effects on mortality, 147–153

V

Validity
smoking reports, 393–401
Vegetables
ascorbic acid predictors, 378–383
Vitamin A
effects, 154–159
Vitamin B_{12}
effects, 154–159

W

Wasting syndrome
effects, 99–106
Weight gain
effects on blood pressure, 497–503
Wheeze
incidence ratio in cross-sectional studies, 52–55
Women
alcohol effects on mortality, 147–153
mid-aged
sex hormones effects, 39–45

Y

Young adults
smoking trends, 301–307
